KRONEN - KVALITETSMÆRKET PÅ ALLE IPL-PRODUKTER

Erfarne medarbejdere på alle niveauer medvirker til produkternes fortsatte høje kvalitet.
Det betyder f.eks., at hvert enkelt produkt gennemgår en særskilt kvalitetskontrol.
Højteknologiske produktionsprocesser sikrer en hidtil ukendt ensartethed i virksomhedens produkter, og IPL er - blandt få producenter - i stand til at garantere kunderne samme kvalitetsstandard flere år frem.

THE CROWN - SYMBOL OF QUALITY ON ALL IPL PRODUCTS

Experienced employees at all levels cooperate in ensuring the continuing high quality of our products. Every single product, for example, passes through its own quality control.
High-technology production processes ensure a hitherto unknown consistency in the company's products. IPL is one of the few manufacturers able to guarantee its customers the same standard of quality for years into the future.

DIE KRONE - DAS QUALITÄTSZEICHEN ALLER IPL-PRODUKTE

Erfahrene Mitarbeiter in allen Bereichen tragen dazu bei, daß die Produkte sich immer auf höchstem Qualitätsniveau befinden.
Dies bedeutet z.B., daß jedes einzelne Produkt einer besonderen Qualitätskontrolle unterzogen wird.
Hochtechnologische Produktionsprozesse sichern eine bisher unbekannte Gleichartigkeit der Produkte des Unternehmens - IPL gehört zu den wenigen Produzenten, die in der Lage sind, über Jahre hinaus den gleichen Qualitätsstandard zu garantieren.

 De egner sig for montering af ventilatorvinger, løbehjul og andet, der skal monteres på en aksel.

Bolt-on-Hubs are designed for use of Taper Bushes and are made of high-grade cast-iron.
 The design allows the same hub to be used from both sides. Thus stock costs may be reduced.
 They provide a convenient means of securing fan rotors, impellers, and other components which must be firmly fastened to a shaft.

Anschraubnaben Typ SM für Taper Buchsen sind aus GG25 gefertigt.
 Die Anschraubnaben sind so ausgefertigt, daß man rotierende Teile wie Lauf-, Lüfterräder oder dergleichen links oder rechts an ihnen und auf einer Welle montieren kann.
 Durch Verwendung von IPL-Anschraubnaben werden die Lagerkosten erheblich verringert.

Beregning af koblingsstørrelse / Coupling selection procedure / Berechnung der Kupplungsgröße

- Valg af driftsfaktor (tabel 6)
Select service factor (Table 6)
Auswahl der Belastungsfaktoren (Tabelle 6)
- Nominal effekt multipliceres med driftsfaktor = foreløbig korrigeret effekt K
Nominal power multiplied by service factor equals temporary designed power K
Nominaleffekt multipliziert mit dem Belastungsfaktor = vorläufiger korrigierter Effekt K
- Korrigeret effekt K multipliceres med faktor L (tabel 7) og S (tabel 8). K x L x S giver den endelige korrigerede effekt, som danner grundlaget for udvælgelsen af koblingsstørrelsen i tabel 9
Designed power K should then be multiplied by factor L (table 7) and S (table 8). K x L x S gives the design power which is used for coupling selection in table 9
Korrigerter Effekt K multipliziert mit L (Tabelle 7) und S (Tabelle 8). K x L x S ergibt den endgültigen korrigierten Effekt und bildet die Grundlage für die Festlegung der Kupplungsgröße in Tabelle 9
- Kontroller i målskitsen (tabel 3 og 4) at koblingen kan monteres
Check from dimensional tables Nos. 3 and 4 that chosen coupling can be fitted.
Bitte überprüfen Sie, ob die gefundene Kupplungsgröße mit den benötigten Einbaumaßen (Tabelle 3 und 4) im Einklang ist.
